Comparing fractions

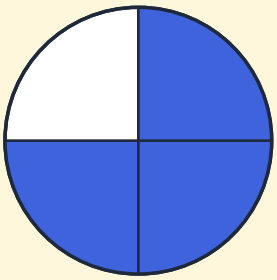

Name _____ Date _____

🎯 **I can compare fractions with >, < and =.**

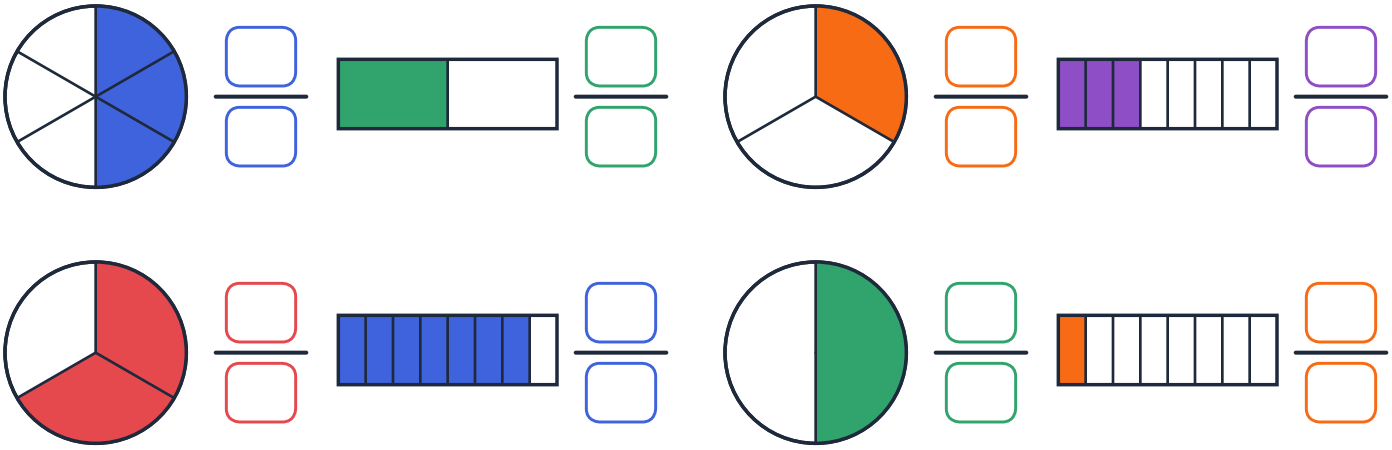

1 How it works 💡

With the same bottom number, the bigger top number is bigger: 3/8 < 5/8. With the same top number, the smaller bottom number is bigger, because the pieces are larger: 1/3 > 1/6.

Always compare fractions of the same whole. Half of a small pizza is not the same as half of a big one.
