How to draw a car

Name _____ Date _____

I can draw a car, one step at a time.

1 Follow the steps

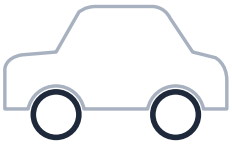

The dark lines are new in each step.

1

Draw the shape of the car: a long box with a smaller box on top. Leave two round gaps at the bottom.

2

Draw a big wheel in each gap.

3

Draw a small circle in the middle of each wheel.

4

Draw two windows in the top part.

5

Add a door line, a handle and a light. Then color your car.

6

All done! Now color your drawing.

Did you know?
The first cars, more than 100 years ago, were not much faster than a horse.
