How to draw a flower

Name _____ Date _____

I can draw a flower, one step at a time.

1 Follow the steps

The dark lines are new in each step.

1

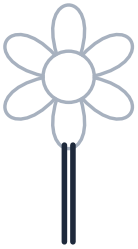

Draw a small circle for the middle of the flower.

2

Draw six round petals around the circle.

3

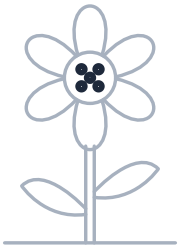

Draw a long stem going down from the bottom petal.

4

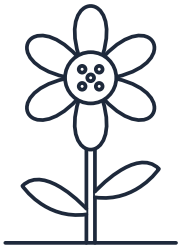

Add a leaf on each side of the stem, and grass at the bottom.

5

Draw a dot pattern in the middle. Then color your flower.

6

All done! Now color your drawing.

Did you know?
Bees visit flowers to drink nectar, and they carry pollen from flower to flower.
