How to draw a ladybug

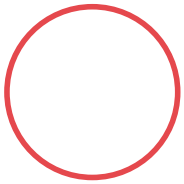

Name _____ Date _____

I can draw a ladybug, one step at a time.

1 Follow the steps

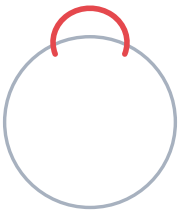

The red lines are new in each step.

1

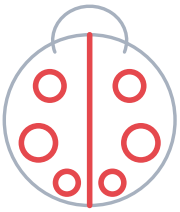

Draw a big circle for the body.

2

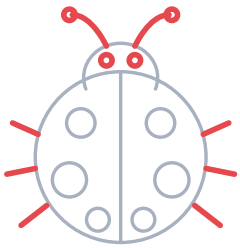

Draw the head: a half circle on top of the body.

3

Draw a line down the middle of the back, and some round spots.

4

Add six little legs and two feelers. Then color your ladybug.

5

All done! Now color your drawing.

Did you know?
A ladybug's bright spots tell birds: "I taste bad, do not eat me!"
