# How to draw a rocket

Name _____ Date _____

I can draw a rocket, one step at a time.

## 1 Follow the steps

The red lines are new in each step.

**1**

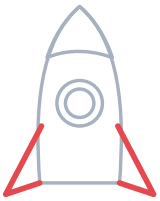

Draw a tall rounded shape for the rocket, pointy at the top.

**2**

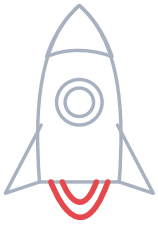

Draw a curved line near the top, and a round window.

**3**

Add a fin on each side at the bottom.

**4**

Draw fire coming out of the bottom.

**5**

Draw some stars around it. Then color your rocket.

**6**

All done! Now color your drawing.

**Did you know?**
A rocket has to go very fast, about 25 times faster than a jet plane, to get to space.

# Draw a rocket on your own

Name _____ Date _____

## 1 Trace it

## 2 Draw it by yourself

## 3 Draw a picture with your rocket in it

Then color it all.
