How to draw a snowflake

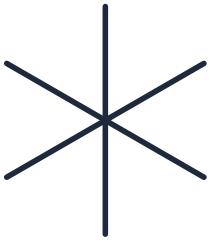

Name _____ Date _____

I can draw a snowflake, one step at a time.

1 Follow the steps

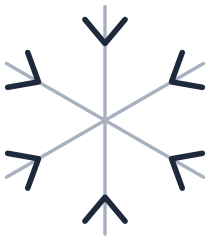

The dark lines are new in each step.

1

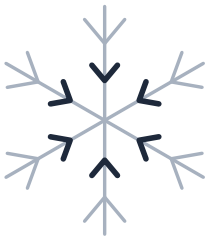

Draw a straight line from top to bottom. Then draw two more lines that cross it in the middle, like a star.

2

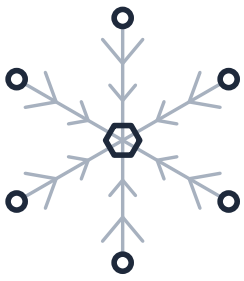

Near the end of each line, draw a V.

3

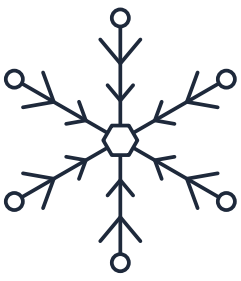

Closer to the middle, draw a smaller V on each line.

4

Draw a small circle at the end of each line and a little shape in the middle. Then color it.

5

All done! Now color your drawing.

Did you know?
Every snowflake has six sides, and no two snowflakes are exactly the same.
