How to draw a tree

Name _____ Date _____

I can draw a tree, one step at a time.

1 Follow the steps

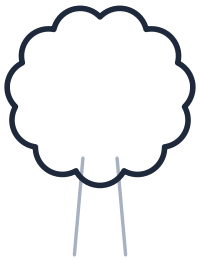

The dark lines are new in each step.

1

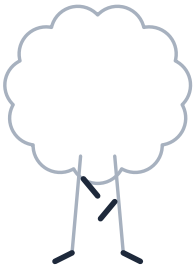

Draw the trunk: two lines that get wider at the bottom.

2

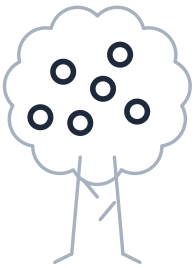

Draw a big bumpy cloud shape on top for the leaves.

3

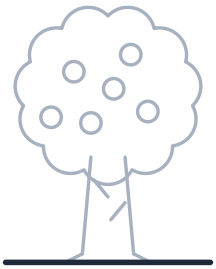

Add two little branches on the trunk and some roots.

4

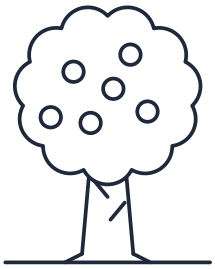

Draw some round apples in the leaves.

5

Draw the grass. Then color your tree.

6

All done! Now color your drawing.

Did you know?
A tree drinks water from the ground with its roots.
