How to draw a turtle

Name _____ Date _____

I can draw a turtle, one step at a time.

1 Follow the steps

The dark lines are new in each step.

1

Draw a big half circle for the shell, with a curved line under it.

2

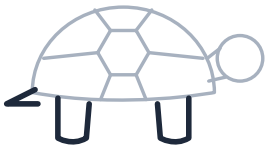

Draw a shape like a stop sign in the middle of the shell, and lines out to the edge.

3

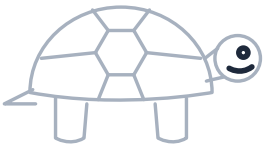

Add a round head on one side.

4

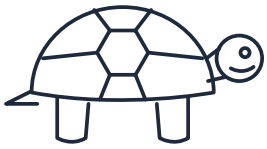

Draw four short legs and a little pointy tail.

5

Give it an eye and a smile. Then color your turtle.

6

All done! Now color your drawing.

Did you know?
Turtles carry their shell all their life. It grows bigger as the turtle grows.
