The Moon

Name _____ Date _____

Nonfiction | 92 words | Key details and new words

I read it: ☆ to myself ☆ to a grown-up ☆ to a friend

1. Look up at night, and you may see the moon. The moon is a big ball of rock. It goes around the Earth.

2. The moon does not make its own light. The light we see comes from the sun. The sun shines on the moon, and the moon **reflects** that light back to us.

3. The moon seems to change shape. Some nights it looks round and full. Other nights it looks like a thin curve. These shapes are called **phases.**

4. People have walked on the moon! **Astronauts** first landed there in 1969.
