Rounding to the nearest 100

Name _____ Date _____

I can round a number to the nearest 100.

1 How it works

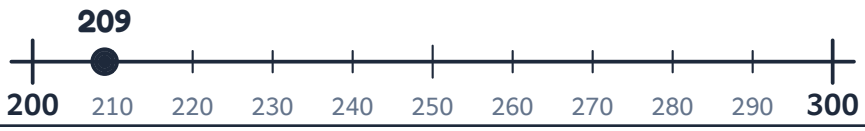

Find the two hundreds the number sits between. 270 is between 200 and 300, and it is closer to 300, so 270 rounds to 300. Shortcut: look at the tens digit. 5 or more rounds up, 4 or less rounds down. 250 is halfway, so it rounds up.

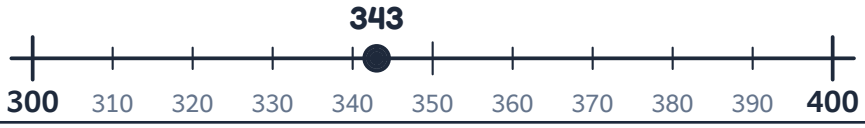

270 is closer to 300, so it rounds to 300.

2 Use the number line

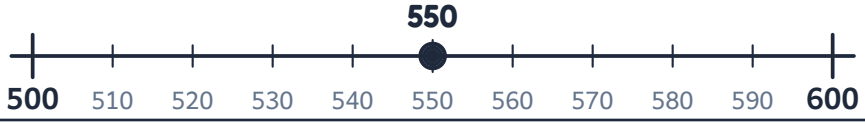

Circle the closer hundred, then round.

2. 

343 rounds to ☐

3. 

550 rounds to ☐

4.
